7. Use will begin about January 1 and end about December 31, of each year.
Month and Day Month and Day

8. Description of proposed works. (Under the provisions of NRS 535.010 you may be required to submit plans and specifications of your diversion or storage works.) Seepage water used as necessary for washing of tailings or pumped to a settling pond to allow deeper working of tailings.
State manner in which water is to be diverted, whether by dam or other works, whether through pipes, ditches, flumes, or other conduits.

9. Estimated cost of works. None for diversion; Up to \$1,000.00 for settling.
10. Estimated time required to construct works. None for diversion; as needed for settling (2 days).
11. Estimated time required to complete the application to beneficial use. Less than one year.
12. Remarks: For use other than irrigation or stock watering, state number and type of units to be served or annual consumptive use.

No consumptive use. One or more units may be used in bulk sampling operations. Rate of diversion may attain 8.9 second feet when seepage water is removed from hole to permit "semi-dry" operation. Water will be placed in a settling pond or mill race for filtering through sand and gravel before reaching river course. Most "diverted" water will be returned to the location it came out of. Diversion of seepage water to a settling pond will ordinarily be done at the beginning of a shift and maintained at a low level throughout the day.
